(54) COSMETIC SIMILAR TO PAPER

(57) Abstract:

PROBLEM TO BE SOLVED: To prepare a paper-like cosmetic giving natural finishes, not causing irregular coloration, color darkening and irregularity, also not causing messy makeup with time, excellent in usability, and also excellent in a UV light-preventing effect, safety and stability.

SOLUTION: This paper-like cosmetic contains 80-99wt.% of a powdery component (e.g. talc) and 1-20wt.% of non-collapsible resin capsules having an average particle diameter of 0.1-20 $\mu$ m, encapsulating a UV light-preventing agent and containing a resin not dissolving the UV light-preventing agent as capsule membranes. The UV light-preventing agent includes a UV light absorbent (e.g. 2-ethylhexyl para-dimethylaminobenzoate) and a UV light-reflecting or absorbing powdery material (e.g. titanium dioxide). The resin used for forming the non-collapsible resin capsules includes methyl methacrylate resin, etc., and used for forming the non-collapsible resin capsules by a known method. The cosmetic components are dispersed in water or a water-containing alcohol, coated on exclusive paper and subsequently dried to prepare the paper-like cosmetic such as paper-like face powder, paper-like foundation, paper-like eye shadow or paper-like cheek rouge.
